

**It's my right
to live so I
make the
effort to
heal myself.**

AMANC®

**Asociación Mexicana de Ayuda
a Niños con Cáncer, I.A.P.**

We are an open door to hope.

The Mexican Childhood Cancer Association (AMANC) was founded in 1982 by Mrs. Maria Guadalupe Alejandre, as a response to the hospital deficiencies faced by the Mexican families that have children and teenagers with cancer.

Mrs. Alejandre learned about these challenges from her son Pablo, who was unable to overcome leukemia at the age of 8.

Since then, AMANC has become the first institution in Mexico to provide free and complete support to children and teenagers with cancer throughout their treatments.

Mexico's Issues

7,000 new cases
of childhood
and adolescent
cancer every
year.

Statistical source: Globocan 2020 and RNCA 2019.
Cancer in Children and Adolescents Registry, Mexican Ministry of Health.
(https://www.gob.mx/cms/uploads/attachment/file/632369/RNCA_2019.pdf)

- The principal cause of death caused by disease in patients aged 5 to 14.
- 23 thousand cases of active treatment and surveillance each year.
- 3 out of 4 cases of childhood cancer are detected in advanced stages.
- Despite the efforts of doctors, government and society, only 57% are able to survive.

What do we work on?

Through a unique, complete and cost-free system, **we provide social support and psychosocial care**, helping children with cancer and their families **during the process of the disease: before, during and after treatment**. To make this possible, our model consists of three different programs:

IMMEDIATE ACCESS TO MEDICAL CARE.

COMPLETE SUPPORT DURING TREATMENT.

QUALITY OF LIFE IN SURVIVAL.

We contribute to the Sustainable Development Goals.

Target Population

The patients supported by AMANC represent a **population of families in high social vulnerability** that don't have any participation on social security programs, or **the resources needed to continue with their treatment.**

AMANC CENTER

This site, built exclusively to **provide social and psychosocial support for high socially vulnerable children and their families**, is located in Tlalpan, within the hospital area situated in the south of Mexico City.

It has the capacity to offer temporary stay for a maximum of **50 children accompanied by a family member**, most of them coming from the rest of the country.

As well, the **AMANC Center** has a **specialized bone marrow transplant recovery area**, unique in the country, and offers open spaces for recreational, educational and productive activities **in a comfortable and loving environment**.

**Working together
we give support to
more than 3,000
patients every year
thanks to the efforts
applied throughout
23 Mexican states
and Mexico City.**

AMANC National Network

As a second-tier organization, **we give support and strengthen the work done at the AMANC facilities in each state** where our intervention program is applied.

Since **the beginning of our decentralization in 1999**, Mrs. Guadalupe Alejandre visited all the states where we have presence to lay the first stone of the local AMANC facilities, making it possible to start with **the replication of our intervention model**.

Impact

1) Savings

\$240,000

is the average annual expense each family saves thanks to the AMANC'S support.

90% of the AMANC Center's patients come from other parts of the country. With your help we can reduce their families' expenses to avoid treatment abandonment and indebtedness, considering that **86% of the families** that we support have an average maximum **family income of \$10,000 pesos per month.**

2) Investment

\$2,145,953.00

pesos is the investment needed to **give complete support to 275 families every month** through the AMANC Center and Casa Angelica. This means an **annual investment of \$25,751,445.00** pesos to help 3,300 families a year. **More donations would make it possible for us to help more and more families!**

3) 0% of treatment abandonment

**Donating is an
act of **love**. There
are different
ways in which
you can help.**
